

WEBSITE NEWS - OPENING AGENDAS AND MINUTES

It has recently come to light that users of Mac devices have trouble opening the agendas and minutes that are available on the hampstonct.org website Event Calendar and Boards/Commissions/Committees pages. When attempting to open these documents using the standard Mac browser "Safari" the contents appear in something that looks like martian, or secret code. To open the documents successfully - in English, that is - using different browsers such as Google or Firefox takes care of the problem.
