**Superintendent's Report
August 30, 2021**

Written 8/24/21

Because of the rapid nature of the changes being made during the past few days and the fact that I need to have this report written by 8/24/21, I am offering you an oral review for your meeting on Monday, August 30, 2021.

I will present to you the following topics for your information with the most up to date information as of your meeting:

1. Current bus routing information and timing as well as my experiences riding the buses morning and afternoons on 8/25,26,and 27/ 2021
2. Current Covid 19 up dates with answers to your questions based on the governor's recent Covid vaccine requirements for all school employees
3. Current weather related decision making process used for the hurricane and heat wave
4. Key issues of the budget for the 2020-2021 with line item transfer information (to be presented during the Business Coordinator's budget line item transfer recommendations in items # 11 & 12)
5. Grant up dates

The school building was fully cleaned and ready for all students. We did have two building based issues that have not yet been addressed. The first is the malfunctioning of the PA system and the second is lack of the complete installation of our new wireless network. These are being addressed but have not been completed for a lack of materials/parts deliveries.

The landscaping was completed. This included the cutting of the grass areas, the weed whacking of all grass growing between the sidewalk expansion joints,

the rototilling of the pre-K / K play area, and the trimming of overgrowth around the building's perimeter.

Finally, we have received letters of resignations from Mr. Shwartz, Mrs. King, Ms. Johnson. We still have one para position open with a possible second "required" para for a newly enrolled student scheduled to start with us on 8/25. This enrollment occurred as I was writing this report. We currently have not received this student's full copy of the educational records
