

"SUMMARY RULING"
(APPROVAL WITH CONDITIONS)

As provided for in Connecticut General Statutes Section 22a-36 through 22a-45, as amended, and in Sections 5, 6 and 9 of the Inland Wetlands and Watercourses Regulations of the Town of Hampton, I move that the application No. **WP0618-01**, and supporting data described below, be approved, and a permit granted, with the standard conditions plus separate conditions listed below, in that the proposed activity does not have a significant impact on the wetlands or watercourses as defined in Section 2.1 of the Inland Wetlands and Watercourses Commission Regulations.

Applicant: Michael Blanchard

Address 191 Rogers Road

Address of Activity: 191 Rogers Road

Property owned by: Michael Blanchard

Maps dated May 31, 2018

Application received on: May 31, 2018

FEE of 255.00 Paid

For the proposed activity: The existing pond will be deepened within the limits of the existing shoreline, the outlet will be fortified with modified rip-rap, trees around the edge of the pond will be removed, spoils will be placed on the East side of the driveway within the Upland Review Area

1. The Inland Wetlands and Watercourses Commission Agent is to be notified 48 hours before the commencement of any part of the activity approved above.
2. The granting of this permit does not relieve the applicant from obtaining additional permits and/or approvals required by other agencies, federal, state and local.
3. If an approval or permit is granted by another agency and contains conditions affecting the wetlands and/or watercourses and the area 200 feet from their flagged boundaries not addressed by this permit, the applicant must resubmit the application for further consideration by the Inland Wetlands and Watercourses Commission, for a decision, before work on the activity is to take place.
4. The duration of this permit is for five (5) years, unless extended by this Agency, and shall expire upon the completion of the activity approved herein or within one year of the start of the activity, whichever is sooner.
5. The applicant shall not assign or transfer this permit, or any part thereof, without the written permission of the Agency.

6. All activities for the prevention of soil erosion, such as silt fences and hay bales, shall be under the direct supervision of the Inland Wetlands Agent and, if he deems it necessary, a certified engineer, who shall employ the best management practices, consistent with the terms and conditions of this permit, to control storm water discharges and to prevent erosion and sedimentation, to otherwise prevent pollution of wetlands or watercourses.
7. All material brought to the site shall be from an approved source. All stone to be washed and all gravel to be used for free flowing backfill shall have less than 5% fine passing the 200 sieve.
8. Work must be conducted as a single phase of construction, to be completed without any unnecessary delays; it has been anticipated that the work will take between 2 -4 days.
9. At a minimum the site shall be protected by a row of haybales at the outlet of the pond, down gradient of spoils deposited on lawn and at the end of driveway.
10. Additional control measures will be installed during the construction period if necessary or required.
11. The Homeowner is assigned the responsibility for implementing this erosion and sediment control plan. This responsibility includes the installation and maintenance of control measures, informing all parties engaged on the construction site of the requirements and objectives of the plan, notifying the Inland Wetlands Commission Office of any transfer of this responsibility, and conveying a copy of the erosion and sediment control plan if the title to the land is transferred.
12. The implementation of a sedimentation/erosion control plan prepared and signed by the Homeowner shall be presented to the Wetlands Agent prior to the start of work; a copy of the same will be given to the contractor.
13. Any material excavated at the site shall be disposed of at the approved location or an off-site location reviewed and approved by the Commission staff prior to the start of the construction activities, silt fence will be installed down gradient of the spoils site; this area will be final graded and hayed and seeded before the contractor leaves the site.
14. A copy of this permit will be provided to the contractor who will be performing the work. Prior to the start of work there will be a site meeting with the Town of Hampton, the contractor, and wetlands agent.
15. If there is a need to provide dewatering of the site, the wetlands agent shall approve

the plans; currently the plan provides for a discharge at the top of the driveway across from the grass entrance to the pond, the discharge will be controlled as it flows down the full length of the driveway to the entrance where it will flow over the bank on the West side of the driveway and through two haybale corrals.

A COPY OF THIS MOTION AND CONDITIONS LISTED, WHEN APPROVED BY A MAJORITY VOTE OF THE IWWA MEMBERS PRESENT AND SIGNED BY THE AGENT, SHALL CONSTITUTE A PERMIT FOR THE ACTIVITY DESCRIBED IN THE APPLICATION AND ACCOMPANYING DATA.

Motion by: Peter Witkowski
Seconded by: Diane Gagnon
Commission Action: Approved
Date: July 3, 2018
Expires: July 3, 2023

John Valente, Wetlands Official
